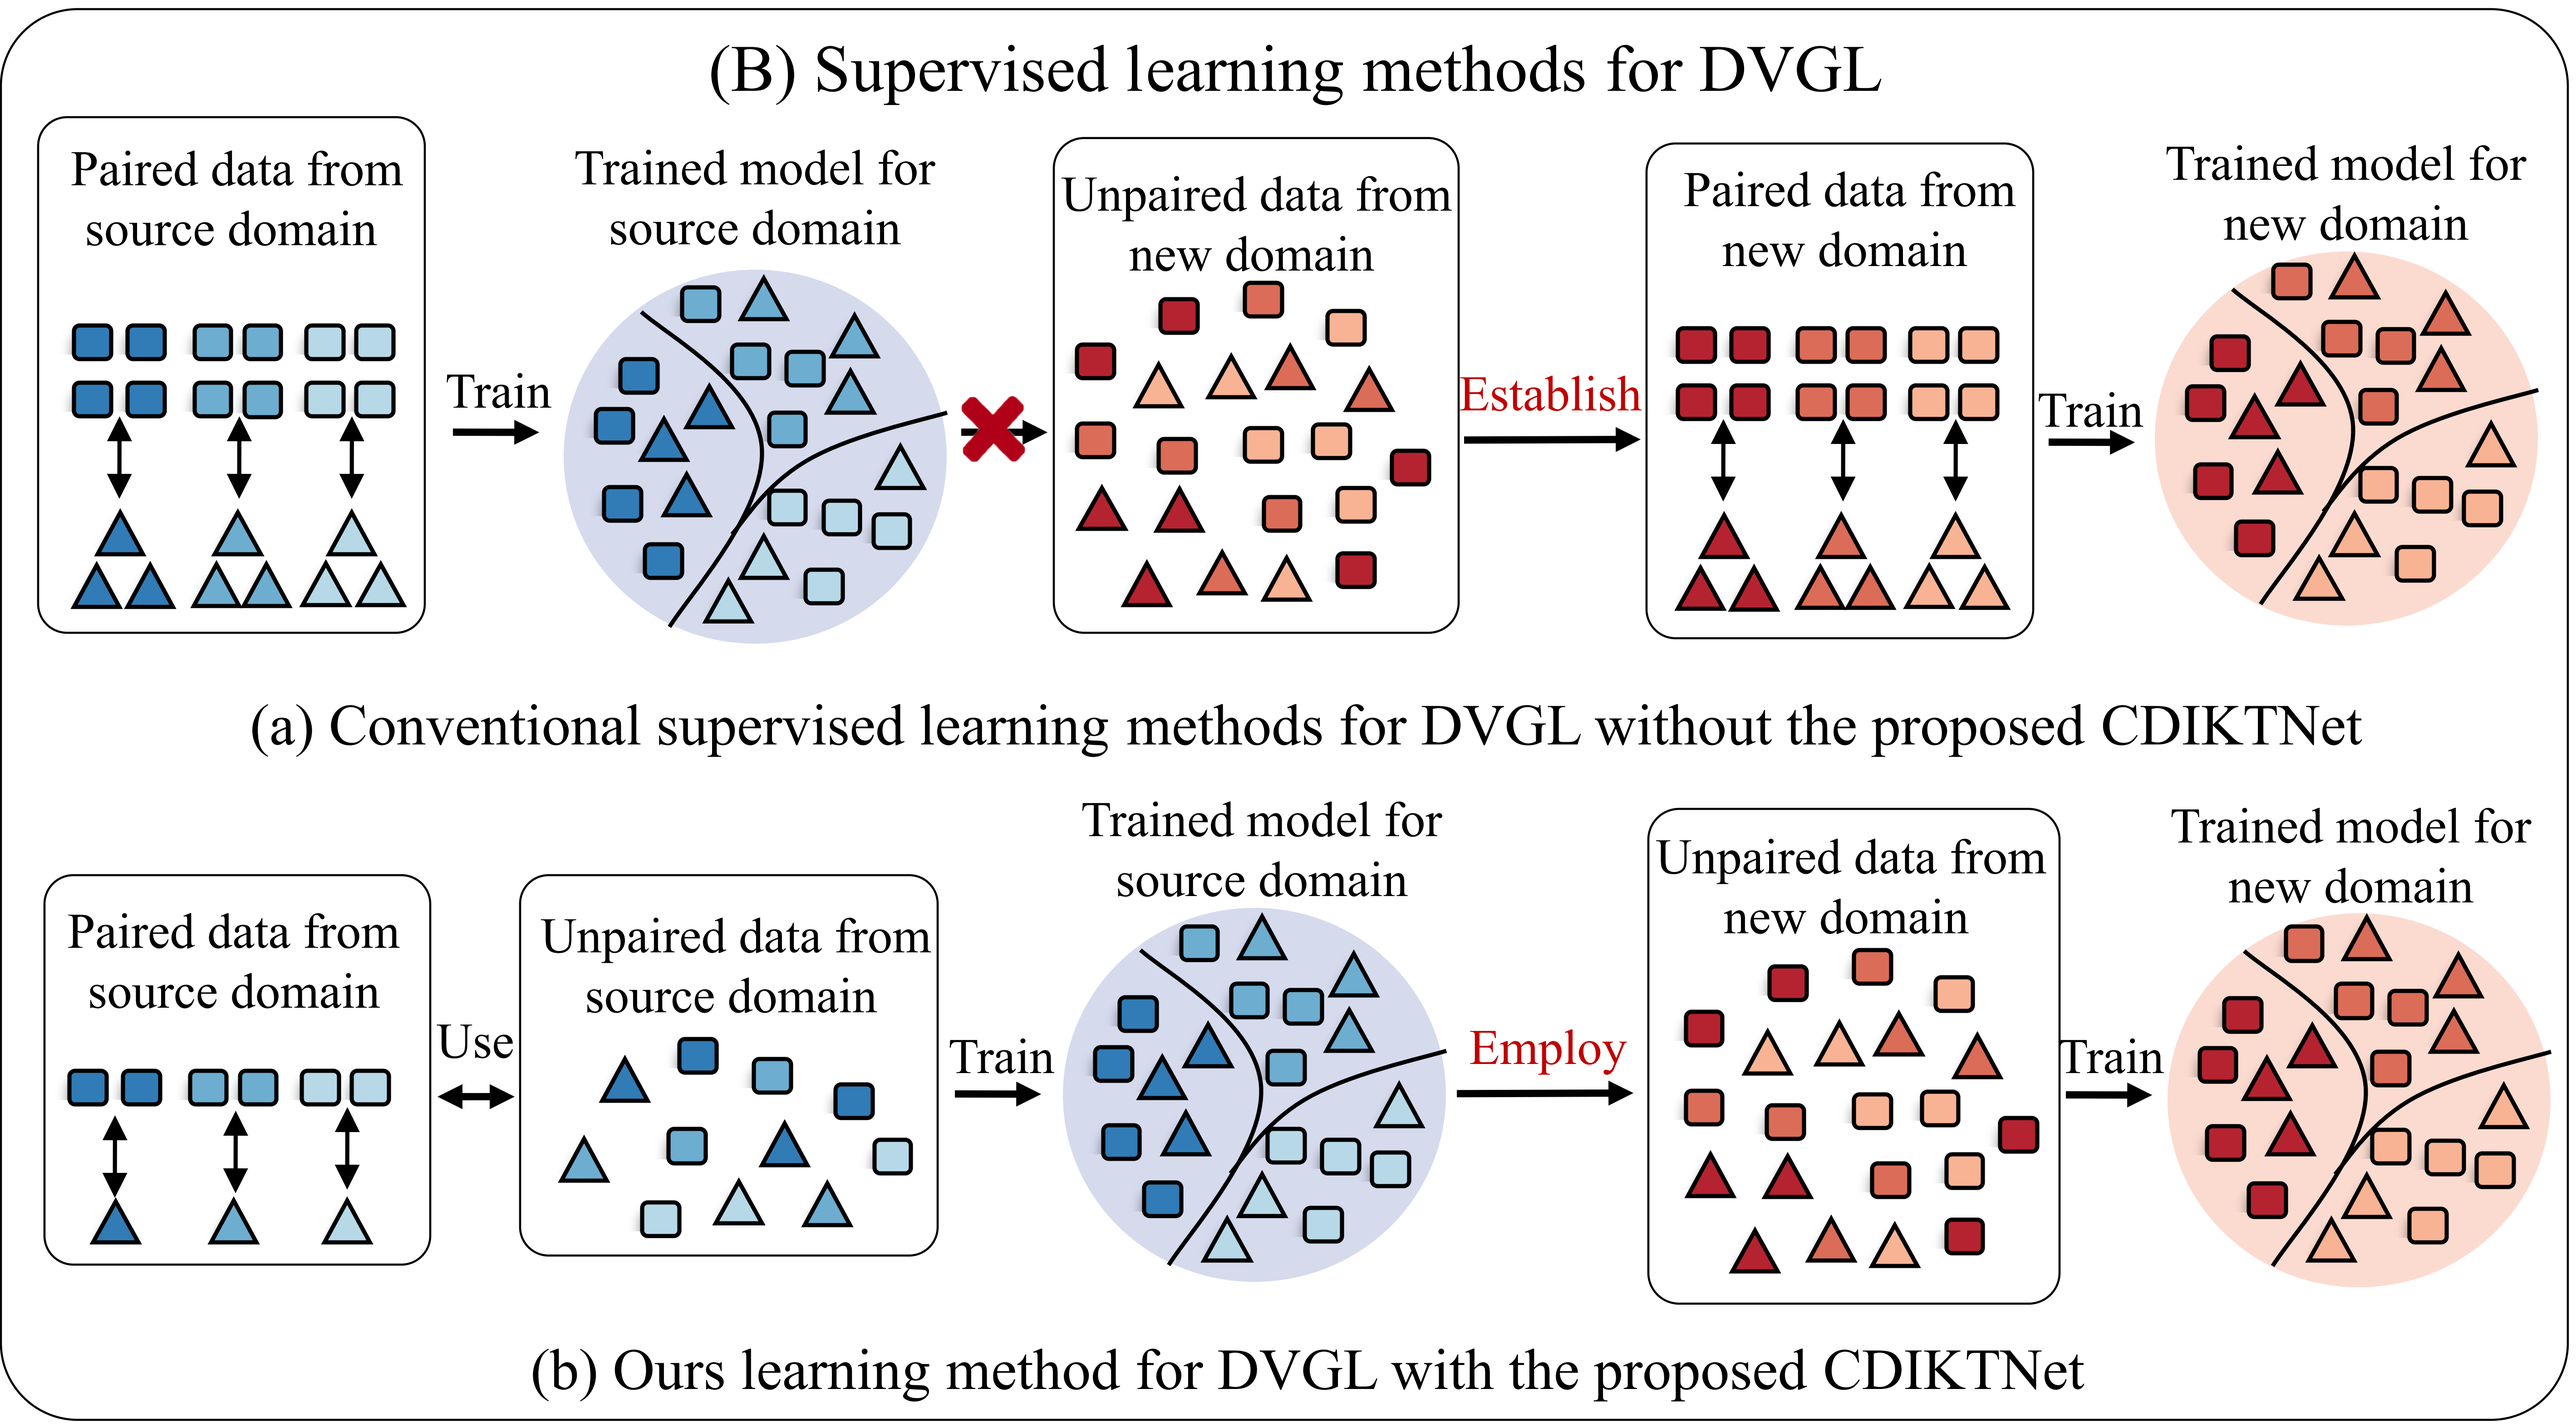
DVGL Without CDIKTNet
A large amount of paired data
A small amount of paired data and unpaired data
DVGL With CDIKTNet
(a) Sample4Geo
(b) Ours



(B) Supervised learning methods for DVGL
Paired data from source domain
Train
Trained model for source domain
Unpaired data from new domain
Establish
Paired data from new domain
Train
Trained model for new domain
(a) Conventional supervised learning methods for DVGL without the proposed CDIKTNet
Paired data from source domain
Use
Unpaired data from source domain
Train
Trained model for source domain
Employ
Unpaired data from new domain
Train
Trained model for new domain
(b) Ours learning method for DVGL with the proposed CDIKTNet
