Unsupervised learning methods for DVGL
Visually similar but from different locations
Learning strategy of current unsupervised methods
Cross-view
Unpaired data
Feature extraction
Shared Feature Space
Incorrect pseudo- labels
Train
Incorrect pseudo- labels
Shared Feature Space
Feature Confusion
Negative Optimization
(a) Unsupervised learning methods for DVGL without the proposed CDIKTNet
VS
A small amount of paired data
Train
Shared Feature Space
Invariant knowledge
Initialize
Unpaired data
Feature extraction
Feature Space
Dual-path Contrastive Learning
Drone Feature Subspace
Satellite Feature Subspace
Shared Feature Space
Dual-path Contrastive Learning
(b) Unsupervised learning methods for DVGL with the proposed CDIKTNet
